KELLER GROUP SELECTS TAGETIK FOR GROUP REPORTING SOLUTION

Tagetik 3.0 brings greater visibility to business operations

London (UK). September 1st 2010 – Tagetik, a global provider of Performance Management, Enterprise Governance, Risk & Compliance and Business Intelligence software solutions, today announced that **Keller Group plc**, the international ground engineering specialist, has selected Tagetik 3.0 to **simplify the Group's consolidation and reporting processes** and to **create a single data repository for all contracts and tenders worldwide**. Keller Group is renowned for providing technically advanced and cost effective ground engineering solutions world-wide.

“Following a thorough evaluation of all the major vendors, we selected Tagetik: they offered a good combination of approach and functionality which would allow us to deliver both the existing financial consolidation functionality together with improved contract and tender reporting; our preference was for an Excel-based solution that sits on SQL Server which Tagetik could offer; we were impressed with Tagetik's integration approach, and during the course of the project Tagetik has continually been prepared to go the extra mile for us, always bringing

solutions rather than potential problems and carefully listening to our specific requirements in order to deliver the most effective solution for the Keller Group business,” explains Dave Benson, Group Financial Controller, Keller Group.

Group-wide Database

Alongside the solution to simplify financial consolidation, the project also encompasses the building of a single database of jobs and tenders across all Group operating companies. This will enable Keller Group to more effectively capture and analyse information across the Group.

Dave Benson explains, “Quality information about jobs and tenders is important to the continued development of our business. Tagetik 3.0 will give us a more automated, centralised system to allow enhanced visibility of our jobs and tenders worldwide. A system that will enable us to more easily monitor key metrics for the Group as a whole, by region, business or even drill-down to individual contracts. Tagetik 3.0 will give us the level of visibility of our business operations that we require to run a world-class organisation.”

“Keller Group required a solution that could both simplify financial consolidation with complex currency requirements across operations in 30 countries and create a single database to streamline the reporting of Group jobs and tenders,” added Shak Akhtar, Managing Director, Tagetik UK and Ireland. “Tagetik 3.0 provides the ideal platform for both an effective consolidation system and an intuitive database to manage all jobs and tenders. The Tagetik team has a key role in implementing both systems to meet the required deadline and to support Keller Group in any system roll-out to subsidiary companies.”

“This project strongly confirms that Tagetik can help organisations to simplify the complexity in managing and monitoring financial performance and operational results,” says Manuel Vellutini, Chief Operating Officer at Tagetik. “As we are specifically dedicated to supporting customers with complex industry-specific needs, many international organisations are selecting Tagetik 3.0 to improve their business. Keller Group will benefit from a unified software environment with ‘built-in’ functionality to effectively manage financial processes at both corporate and operational levels.”

About Tagetik

*Tagetik – a Microsoft Gold Certified Partner – delivers a unified software solution to support **Performance Management** and **Enterprise Governance, Risk & Compliance**, plus extended **Business Intelligence, Collaboration** and **Communication**. Tagetik 3.0 creates value by **simplifying complex business processes for CFOs and CIOs**: budgeting, planning and forecasting, consolidation and reporting, financial governance, strategy management, profitability modeling, working capital analysis and compliance/industry requirements. Tagetik 3.0 is the solution to translate strategy into operations, manage and control overall performance down to business transactions, and improve decision-making across the whole organization while achieving faster ROI and lower total cost of ownership (TCO).*

*Tagetik operates in 13 countries leveraging a close partnership with Microsoft. Its market experts are totally committed to the success of **400 worldwide customers**, including some of the largest Fortune 1000 companies and representing all industries, as well as to foster synergies with system integrators, technology leaders and local consulting specialists.
