

# CCH TAGETIK IFRS 17 SOLUTION

## PREPARING FOR IFRS 17

With the new IFRS 17 for insurance contracts, insurers will have to significantly change the accounting for liability measurement and profit recognition. CCH Tagetik has an automated solution for addressing the new and expanding compliance requirements (Solvency II for example). CCH Tagetik provides an IFRS reporting hub including data repository, calculation modeling, reporting and disclosures in one easy-to-use solution. With CCH Tagetik for IFRS 17 you can focus on your business with confidence that you're in compliance with regulatory standards. CCH Tagetik for IFRS 17 provides data collection, calculations, postings, reporting and disclosures of insurance contracts.

## CCH TAGETIK IFRS 17 SOLUTION

### Fast Setup

Pre-configured solution gets you compliant quickly with a lower total cost of ownership (TCO). Out of the box, users get a data repository, a data model that's IFRS 17 compliant, a library of insurance contract data models and pre-configured workflow with a toolset to easily prepare reports and disclosures.

### Single Version of Truth

Creates a single insurance contract data repository to accurately calculate, report and disclose for IFRS 17 and other reporting requirements. With confidence in your numbers and integration with Qlik Sense and Microsoft BI solutions you can spend more time on analysis and planning.

### Easily Integrated

CCH Tagetik's IFRS solutions are non-disruptive to existing architectures - they integrate with all your systems, including CCH Tagetik CPM and non-CCH Tagetik applications, on premises or on the cloud. CCH Tagetik's ETL capabilities allow you to seamlessly integrate with any source system to import or export data.

### Flexible Modelling

With CCH Tagetik's calculation engine and the power of analytics, you can process and calculate large volumes of data quickly. Flexible modelling allows you to easily extend and maintain the library of contract models, configure calculation logic and rules with a Finance friendly interface to stay compliant.

### Disclosure and Reporting

A single version of data and our Collaborative Office solution makes it easy to report while adhering to IFRS 17's disclosure requirements. A drillable financial statement, a pdf board book, a PowerPoint or a submission to regulators; the numbers and narrative are accurate and auditable.

### Process Monitoring

Monitor the whole process with a dashboard that provides the status throughout the submission, adjustment and consolidation process. Using CCH Tagetik's preconfigured workflow and communication tools unify the entire cycle and keep contributors on track and reports on time.

*“The IFRS accounting changes, with pervasive impacts, require a solution which can meet demanding functional and data requirements. CCH Tagetik offers an integrated IFRS platform which enables the CFO and the office of finance to be compliant with the IFRS changes and also obtain valuable insights into the business performance.”*

*Jay Tahtah  
Partner Capital Markets and Accounting Advisory Services, PwC*

## KEY CAPABILITIES

- Load and map from internal and external data sources
- Data Repository
- Data validation and controls
- Preconfigured data model
- Preconfigured and extendable calculation logic
- Reporting and Disclosures
- Audit Trail
- Workflow

## IFRS 17 CALCULATION LOGIC

- Calculate using the Building Block Approach (BBA), Premium Allocation Approach (PAA) or Variable Fund Approach (VFA)[future release]
- Calculates liabilities for remaining coverage (LRC), liabilities for incurred claims (LIC) and contractual service margin (CSM).
- Discounts future cash flows, calculates risk adjustment and CSM at initial recognition and in subsequent measurements.
- Calculations are performed at a portfolio, subportfolio or the proper aggregation level in order to determine CSM and perform onerous contract test.

## WHY CCH TAGETIK?

**Roadmap for Regulatory Solutions:** IFRS 9, Revenue Accounting, Lease Accounting, IFRS 17, FinRep, CoRep and Solvency II solutions.
